

Make: Rockets: Down-to-Earth Rocket Science

By Mike Westerfield

Maker Media, Inc. Paperback. Book Condition: New. Paperback. 520 pages. Dimensions: 9.7in. x 8.0in. x 1.0in.Make: Rockets, Down to Earth Rocket Science, is for all the science geeks who look at the moon and try to figure out where Neil Armstrong walked, watch in awe as rockets lift off, and want to fly their own model rockets. Starting from the ground up you how to build all sorts of rockets and associated equipment with clear, step-by-step directions. Its easy to skip the more detailed material, but when you are ready, Make: Rockets will help you rise to new heights with detailed coverage of the math and science behind building, flying and tracking rockets. You will learn: How to safely build and fly solid propellant, water and air powered rockets. All the techniques needed to build model rockets, launchers and trackers. How to recover rockets by parachute, streamer, glider, helicopter recovery and more. How to fly payloads like cameras, altimeters and the ever popular egg lofter! How to pick the right motor and parachute for any rocket or payload. Aerodynamic principles for designing stable, low drag rockets that slip through the air--including one rocket that can hit 500 mph! How to...

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion. -- Andres Bashirian

Comprehensive guide for publication fanatics. This really is for all who statte there had not been a well worth reading through. I discovered this ebook from my dad and i encouraged this book to find out. -- Lacy Goldner
